The workers of Vons, Ralphs, Pavillions, and Albertsons are either on strike or have been locked out for over a month and half now. These committed people are at the frontline of the battle to save affordable health care. Consider the following;

- operating profits have gone up 91% since 1998
- operating profits have increased ten times faster than the cost of health care
- the increased cost for health care has been significantly below the national average in this case
