

Radio Summer Camp

A four day workshop session sponsored by Free Radio Berkeley to teach you how to build FM broadcast transmitters (and other related items such as antennas) and set up a low power (15-100 watt) community radio station capable of covering a broadcast radius between 5 and 15 miles depending on power, terrain and antenna height.

The workshop tuition is \$100-\$200 sliding scale. Kits for transmitters, antennas, etc. may be purchased for assembly during the workshop session. Average cost for a broadcast station kit package (transmitter, antenna, cabling power, supply) runs between \$300 and \$600 depending on kits and power level chosen.

Four Radio Camp sessions, which run Friday through Monday, will be held on the following dates:

June 4, 5, 6, 7

July 2, 3, 4, 5 (Fourth of July holiday weekend)

July/August 30, 31/1, 2

September 3, 4, 5, 6 (Labor Day holiday weekend)

Sessions will start at 10 am and end at 6 pm everyday. At least one session, the July 2-5 one, will be bi-lingual, Spanish and English.

An attempt will be made to make housing arrangements for out of town participants. If possible, attendees should arrange for their own housing needs.
