Dr. Bowman challenges us to “Take Back America” for the people. He explains why we need a government that:

- (1) Follows the Constitution**
- (2) Honors the Truth, and**
- (3) Serves the People.**

Think what a difference that would make! No more undeclared wars of aggression. No more spying on the American people. No more jailing of dissidents. No more hordes of illegal aliens driving down wages. No more exporting of jobs. No more NAFTA. No more North American Union. No more government lies, false-flag attacks, and cover-ups. No more corporate welfare. No more health plans written by insurance companies and pharmaceutical manufacturers. No more energy policies written by Exxon and Enron. No more trillions in debt. Most importantly, no more using our sons and daughters to kill Arabs for the oil companies.

**Let's “Take Back America!!”**
