A revealing and provocative look into the deep secrets and deep pockets of the pro-life movement, *UNBORN IN THE USA: Inside the War on Abortion* weaves a riveting story from more than 70 exclusive interviews with pro-life activists and seldom-seen archival footage to document one of the most controversial social movements in American history.

This documentary examines the strategies of American anti-abortion activists. Mild-mannered college students are trained by conservative Christian organization Focus on the Family on how to infiltrate campuses and make their points. Other activists are more agitated, including the Rev. Don Spitz, who advocates violence against abortion doctors and clinics. Many rely on graphic, blown-up photographs of aborted fetuses to get people's attention, often infuriating passers-by.

Filmmakers Stephen Fell and Will Thompson gained unprecedented access to pro-life groups, movement icons, fundraising machines, and even university students being specially groomed to carry the pro-life message for college credit, traveling across 35 states to bring us this eye-opening, often startling story.

**Our doors open at 1:15 for socializing and the film will screen at 1:45.
A discussion will follow the film.**
