Permaculture Design Course

At Los Angeles Eco-Village
Six Weekends January-March, 2007

We CAN Save the Planet Without Leaving the City

January 13/14 & 27/28 • February 2/3 & 24/25 • March 10/11 & 24/25

Using the positive, solutions-oriented holistic design science of permaculture, we can redesign our cities to integrate harmoniously with Nature, learning to observe and solve problems the way she does. This complete, six-weekend permaculture design certification course focuses on creative, pro-active strategies for urban environments.

Ethics, soils, water catchment and cleaning, ecological systems, food production and security, reading the landscape, ecovillages, renewable energies, natural building, activism, non-violent communication, alternative currencies, urban land reform strategies and more will be covered.

Hands-on experience, site-visits and field trips.

Instructors: **Scott Horton**, designer, eco-artist and editor of the Permaculture Activist, **Kat Steele**, community organizer, activist and founder of the Urban Permaculture Guild, guests **Dr. Bill Roley**, long-time Southern California permaculture and sustainability designer and teacher, **Lois Arkin** of Los Angeles Eco-Village, **David Haskell** from New Zealand, artist **Bradley Mowers**, non-violent communications expert **Alex Abbassi**, and others.

\$800 including all course materials and lunches during the course.
