TOWN HALL MEETING

Help define the future of the Internet in America

High-speed Internet access is no longer a luxury. It's a lifeline for all Americans. But millions still stand on the wrong side of the "digital divide."

On Dec. 6, InternetforEveryone.org is holding a town hall meeting in Los Angeles to kick-start the movement to give all Americans access to a high-speed Internet connection.

Getting everyone connected is a national priority that must begin at the local level, with conversation among small-business owners, community activists, local politicians, artists, educators and people from all walks of life. Working together, we can build a better Internet.
