Join the protest to say no to foreclosures and to let the banks, the governor and the White House know that we want real action!

Public Forum: A Workers' Program for a Real Recovery

The big business media often talk about the signs of economic recovery, but so far there has only been a recovery of profits for the banks and giant corporations. Unemployment is officially at 9.4% and if you count the underemployed and discouraged workers, it is in reality closer to 20%. The number of houses in foreclosure nationwide has mushroomed. Trillions of dollars are being spent on war instead of being used to bail out the people, and workers - in particular public workers - are under attack by the bosses!

People are organizing and fighting back against foreclosures and for jobs all across the country everyday.

Come and listen to the talks in this important public forum and participate in the discussion afterward! Learn how you can get involved in the peoples' movement for jobs and justice.
