Community Outreach

**Find Out More**

**Why**

### What is "I Spayed LA"?

"I Spayed LA" targets stray and feral cats for sterilization in the 90037 and other surrounding zips. Trap Neuter Return (TNR) is the only answer to reducing the number of homeless kitties. By targeting a specific area, we have the opportunity to not only reduce the number of unwanted cats that are turned into the shelter therefore reducing the kill rate, but we have the opportunity to educate people about the importance of spa/neuter in general. We also have the opportunity to educate people about feral or what we like to refer to as "community cats"
